INDEPENDENT AUDITOR'S REPORT

To the Board of Education
White Cloud Public Schools
White Cloud, Michigan

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of White Cloud Public Schools, White Cloud, Michigan as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of White Cloud Public Schools, White Cloud, Michigan as of June 30, 2018, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter- Change in Accounting Principle

As discussed in Note 3.S. to the financial statements, White Cloud Public Schools implemented Governmental Accounting Standards Board Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplementary information, as identified in the table of contents, on pages iv through xi and 39-44 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise White Cloud Public Schools' basic financial statements. The combining and individual fund financial statements and other information are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual fund financial statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The other information has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated September 19, 2018, on our consideration of White Cloud Public Schools' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of White Cloud Public Schools' internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering White Cloud Public Schools' internal control over financial reporting and compliance.

BAIRD, COTTER AND BISHOP, P.C.

Baird, Cotter & Bishop, P.C.

This section of White Cloud Public Schools' ("the District") annual report presents our discussion and analysis of the District's financial performance during the year ended June 30, 2018. Please read it in conjunction with the District's financial statements, which immediately follow this section.

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The basic financial statements consist of the following three components: the government-wide financial statements, fund financial statements, and the notes to basic financial statements. This report also contains other supplementary information in addition to the basic financial statements.

A. Government-Wide Financial Statements

The government-wide statements provide short-term and long-term financial information about the District's overall financial status. The district-wide financial statements are compiled using full accrual basis of accounting and more closely represent financial statements presented by business and industry. The Statement of Net Position includes all of the District's assets and liabilities. All of the year's revenue and expenses are accounted for in the Statement of Activities regardless of when cash is received or paid.

The two district-wide statements report the District's net position and how they have changed. Net position – the difference between the District's assets and liabilities – is one way to measure the District's financial health or position.

Over time, increases and decreases in the District's net position are indicators of whether its financial position is improving or deteriorating, respectively.

To assess the overall health of the District requires consideration of additional non-financial factors, such as changes in the District's property tax base and the condition of school buildings and other facilities.

In the government-wide financial statements, the District's activities are all shown in one category titled "Governmental Activities". These activities, including regular and special education, transportation, administration, food services, athletic activities, and community services, are primarily financed with state and federal aids and property taxes.

B. Fund Financial Statements

The fund financial statements provide more detailed information about the District's funds, focusing on its most significant or "major" funds, rather than the District as a whole. Funds that do not meet the threshold to be classified as major funds are called "non-major" funds. Detailed financial information for non-major funds can be found in the combining and individual fund statements section.

Funds are accounting devices the District uses to keep track of specific sources of funding and spending on particular programs.

Some funds are required by state law and by bond covenants. The District may establish other funds to control and manage money for particular purposes.

The District maintains the following kinds of funds:

Governmental Funds – The District's basic services are included in governmental funds, which generally focus on 1) how cash and other financial assets that can be readily be converted to cash flow in and out, and 2) the balances left at year-end that are available for spending. Consequently, the governmental funds statements provide a detailed short-term view that helps to determine whether there are more or less financial resources that can be spent in the near future to finance the District's programs. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information (reconciliation schedules) immediately following the governmental funds statements that explain the relationship (or differences) between these two types of financial statement presentations.

Fiduciary Funds – The District is a trustee, or fiduciary, for assets that belong to other organizations. The District is responsible for ensuring that the assets reported in these funds are used only for their intended purposes and by those to whom the assets belong. The District's fiduciary activities are reported in a separate Statement of Fiduciary Net Position. We exclude these activities from the government-wide financial statements because the District cannot use these assets to finance its operations.

Notes to Financial Statements

The notes provide additional information that is necessary to acquire a full understanding of the data provided in both the government-wide and the fund financial statements.

Other Information

In addition to the basic financial statements and accompanying notes, this report further presents Required Supplementary Information (RSI) that explains and supports the information presented in the financial statements.

C. Summary of Net Position

The following schedule summarizes the net position at fiscal year ended June 30. The prior year has not been restated to include the new GASB No. 75 Standards–*Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*:

	2018	2017
Assets		
Current Assets	$ 3,143,961	$ 8,833,460
Non Current Assets		
Net of Accumulated Depreciation and Amortization	21,799,016	17,900,149
Total Assets	24,942,977	26,733,609
Deferred Outflows of Resources		
Deferred Charges on Refunding	139,413	158,168
Deferred Outflows of Resources Related to Pensions	3,744,747	2,417,803
Deferred Outflows of Resources Related to OPEB	291,199	0
Total Deferred Outflows of Resources	4,175,359	2,575,971
Total Assets and Deferred Outflows of Resources	$ 29,118,336	$ 29,309,580

	2018	2017
Liabilities		
Current Liabilities	$ 3,038,854	$ 4,544,224
Long-Term Liabilities	40,733,634	36,116,671
Total Liabilities	43,772,488	40,660,895
Deferred Inflows of Resources		
Deferred Inflows of Resources Related to Pensions	1,521,663	756,342
Deferred Inflows of Resources Related to OPEB	165,382	0
Total Deferred Inflows of Resources	1,687,045	756,342
Net Position		
Net Investment in Capital Assets	7,156,365	6,095,077
Unrestricted - (Deficit)	(23,497,562)	(18,202,734)
Total Net Position - (Deficit)	(16,341,197)	(12,107,657)
Total Liabilities, Deferred Inflows of Resources and Net Position	$ 29,118,336	$ 29,309,580

D. Analysis of Financial Position

During the fiscal year ended June 30, 2018, the District's net position increased by $690,850. A few of the more significant factors affecting net position during the year are discussed below:

1. Depreciation Expense

The school district is required to maintain a record of annual depreciation expense and the accumulation of depreciation expense over time. The net increase in accumulated depreciation expense is a reduction in net position.

Depreciation expense is recorded on a straight-line basis over the estimated useful lives of the assets. In accordance with GAAP, depreciation expense is calculated based on the original cost of the asset less an estimated salvage value, where applicable. For the fiscal year ended June 30, 2018, $672,418 was recorded for depreciation expense.

2. Capital Outlay Acquisitions

For the fiscal year ended June 30, 2018, $4,571,285 of expenditures were capitalized and recorded as assets of the District. These additions to the District's capital assets will be depreciated over time as explained above.

The net effect of the new capital assets and the current year's depreciation is an increase to capital assets in the amount of $3,898,867 for the fiscal year ended June 30, 2018. An increase to net capital assets is a rise in net position.

3. Pension and Other Postemployment Benefit Expense

GASB 68 & 75 now require the District to account for its payments to the Michigan Public School Employees' Retirement System in a manner that has a significant effect on the District's change in net position. Based on various factors, the District may report an increase or decrease in net position depending on whether the District's proportionate share of the net pension and OPEB liabilities increases or decreases in any given year. For the year ended June 30, 2018, the District reported a decrease in net position related to GASB 68 and 75 of $270,278 related to GASB 68 and 75.

4. Payment of Principal on Long-Term Debt and Issuance of Debt Proceeds

During the year ending June 30, 2018, the District reduced the principal on its long-term liabilities by $1,535,000. The payment of principal results in an increase to net position

E. Change in Net Position

The following schedule summarizes the results of operations, on a district-wide basis, for the year ended June 30. The prior year has not been restated to include the new GASB No. 75 Standards–*Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*:

	2018	2017
Revenue		
Program Revenue:		
Charges for Services	$ 91,647	$ 148,967
Operating Grants	3,219,731	2,654,507
General Revenue:		
Property Taxes - Levied for General Purposes	1,503,832	1,450,857
Property Taxes - Levied for Debt Service	1,692,432	1,652,472
Investment Earnings	33,695	46,290
State Sources	5,523,041	5,556,512
Gain on Sale of Capital Assets	127,120	0
Other	222,800	48,801
Total Revenue	12,414,298	11,558,406

	2018	2017
Function/Program Expense		
Instruction	6,201,579	6,156,347
Supporting Services	3,633,652	3,512,020
Community Services	10,064	1,984
Facilities Acquisition, Construction, and Improvements	6,209	5,521
Food Services	522,110	493,222
Interest on Long-Term Debt	677,416	675,537
Other Transactions	0	3,700
Unallocated Depreciation	672,418	588,504
Total Expenses	11,723,448	11,436,835
Change in Net Position	$ 690,850	$ 121,571

F. Financial Analysis of the District's Funds

The financial performance of the District as a whole is also reflected in its governmental funds. The following table shows the change in total fund balances of each of the District's governmental funds:

	2018	2017	Increase (Decrease)
Major Fund			
General Fund	$ 1,353,675	$ 999,264	$ 354,411
2016 School Building and Site Fund	0	4,463,208	(4,463,208)
Nonmajor Funds			
Food Service	261,761	236,585	25,176
Debt Retirement Funds	208,283	326,908	(118,625)
Total Governmental Funds	$ 1,823,719	$ 6,025,965	$ (4,202,246)

As we noted earlier, the District uses funds to help it control and manage money for particular purposes. Looking at funds helps the reader consider whether the District is being accountable for the resources taxpayers and others provide to it and may provide more insight into the District's overall financial health.

As the District completed this year, the governmental funds reported a combined fund balance of $1,823,719, which is a decrease of $4,202,246 from last year.

- The General Fund, our principal operating fund, increased its fund balance by $354,411 for an ending balance of $1,353,675. This increase is primarily due to an increase in revenues from the prior year, mostly from state aid and non-recurring one-time revenues. Of the fund balance of $1,353,675, $35,678 is nonspendable for prepaid expenditures, $79,937 is committed for retirement contracts, $83,117 is assigned for subsequent year budget shortfall, and $1,154,943 is unassigned.

- The 2016 School Building and Site Fund decreased its fund balance by $4,463,208 for an ending balance of $0. The decrease in fund balance is a result of spending bond proceeds for school building and site improvements.

- The Food Service Fund increased its fund balance by $25,176 for an ending balance of $261,761. The increase can be attributed to switching to the CEP program, which resulted in more federal revenues. Of the fund balance of $261,761, $4,565 is nonspendable for inventory and $257,196 is restricted for food service.

- The debt retirement funds decreased their fund balance by $118,625 for an ending balance of $208,283. The decrease in the Debt Retirement Funds can be attributed to planned debt payments exceeding tax revenues. The entire fund balance of $208,283 is restricted for debt service.

G. General Fund Budgetary Highlights

The Uniform Budget Act of the State of Michigan requires that the local Board of Education approve the original budget for the upcoming fiscal year prior to its starting on July 1. Any amendments made to the operating budget must be approved by the Board prior to the close of the fiscal year on June 30.

For the 2017-2018 fiscal year, the District amended the general fund budget various times throughout the year. The following schedule shows a comparison of the original general fund budget to actual totals from operations:

	ORIGINAL BUDGET	FINAL BUDGET	ACTUAL
TOTAL REVENUES	$ 9,438,271	$ 9,954,011	$ 9,933,092
EXPENDITURES			
Instruction	$ 5,993,748	$ 6,291,866	$ 6,137,689
Supporting Services	3,473,049	3,680,985	3,586,048
Community Activities	10,600	12,060	10,064
Total Expenditures	$ 9,477,397	$ 9,984,911	$ 9,733,801

The revenue budget was amended as it became clearer on the amounts the District would receive for State and Federal Funding, as well as funding from Property Taxes and Local Grants. There were minimal changes between the final budget and actual budget, except for additional one-time revenue sources.

The variances in total expenditures from original budget to final budget was due to updating expenditure assumptions primarily related to staffing and benefits. The variance in final budget to actual expenditures was due to conservative budgeting of expenditures.

H. Capital Asset and Debt Administration

1. Capital Assets

At June 30, 2018, the District has $31,556,334 in a broad range of capital assets, including school buildings and facilities, school buses, and various types of equipment. Depreciation expense for the year amounted to $672,418, bringing the accumulated depreciation to $9,757,318 as of June 30, 2018.

The additions to capital assets included:

- Building Improvements in the amount of $6,893,003, including prior year construction in progress in the amount of $2,358,263.
- High School Dishwasher in the amount of $30,286.
- Shortiron Backblade in the amount of $6,259.

Deletions of capital assets primarily consisted of the disposal of assets replaced during the bond capital project.

Additional information on the District's capital assets can be found in the notes to this report.

2. Long-Term Debt

At the end of this year, the District had $38,596,611 in long-term debt outstanding versus $39,252,875 in the previous year. This represents a decrease of $656,264 from the prior year. The majority of this debt consists of bonds payable of $13,495,000. Other obligations include amounts borrowed from the School Bond Loan Fund and School Loan Revolving Fund of $4,978,363, employee compensated absences and retirement contracts estimated at $875,187, net pension liability of $14,356,153, and net other postemployment benefits liability of $4,891,908.

Additional information on the District's long-term debt can be found in the notes to this report.

I. Factors Bearing on the District's Future

At the time that these financial statements were prepared and audited, the District was aware of the following items that could significantly affect its financial health in the future:

- The District, like many in the State, has seen declining enrollment over recent years, and understands the potential loss in State funding for the 2018-2019 fiscal year.
- As with other employers, the District continues to face increases in rates paid for employee benefits, particularly health insurance and retirement.
- With passage of the bond, technology and infrastructure needs were addressed in part. This allows the District to concentrate available funds to much needed areas such as staffing, and supply needs as well as repair and maintenance projects. However, the District still faces several infrastructure needs, such as roofing.

- The District has settled contracts with all staff members. This means the District will maintain Wage and Benefit stability throughout the 2018-2019 fiscal year.

J. Contacting the District's Financial Management

This financial report is designed to provide the District's citizens, taxpayers, customers, investors, and creditors with a general overview of the District's finances and to demonstrate the District's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the Business Department, 555 Wilcox Street, White Cloud, Michigan 49349.

RECONCILIATION OF THE BALANCE SHEET OF GOVERNMENTAL FUNDS TO THE STATEMENT OF NET POSITION

JUNE 30, 2018

Total Governmental Fund Balances		$ 1,823,719
Amounts reported for governmental activities in the Statement of Net Position are different because:		
Capital assets used in governmental activities are not financial resources and are not reported in the funds.		
The cost of the capital assets is	$ 31,556,334	
Accumulated depreciation is	(9,757,318)	21,799,016
Long-term liabilities are not due and payable in the current period and are not reported in the funds.		
Bonds Payable		(13,495,000)
School Bond Loan Fund Loan		(4,978,363)
Compensated Absences and Retirement Contracts		(875,187)
Accrued interest is not included as a liability in governmental funds, it is recorded when paid.		(2,579,371)
Bond discounts for bonds issued after June 30, 2002, are expenditures at the modified accrual fund level, but are capitalized and written off over the life of the bonds payable at the district-wide full accrual level.		
Deferred Loss on Refunding		139,413
Bond Discount (Premium)		(1,287,064)
Other long-term assets are not available to pay for current period expenditures and therefore are recorded as deferred inflows of resources in the funds.		
Federal Grants		10,800
Some liabilities, including net pension and OPEB obligations, are not due payable in the current period and, therefore, are not reported in the		
Net Pension Liability		(14,356,153)
Net OPEB Liability		(4,891,908)
Deferred outflows and inflows of resources related to pensions and OPEB are applicable to future periods and, therefore, are not reported in the funds.		
Deferred Outflows of Resources Related to Pensions and OPEB		4,035,946
Deferred Inflow of Resources Related to Pensions and OPEB		(1,687,045)
NET POSITION OF GOVERNMENTAL ACTIVITIES - (DEFICIT)		$ (16,341,197)

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

YEAR ENDED JUNE 30, 2018

Net Change in Fund Balances Total Governmental Funds	$ (4,202,246)
Amounts reported for governmental activities are different because:	
Governmental funds report capital outlay as expenditures. In the Statement of Activities, these costs are allocated over their estimated useful lives as depreciation. Additionally, the gain or loss on sale or disposal of capital assets is recorded in the statement of activities.	
Depreciation Expense	(672,418)
Capital Outlay	4,571,285
Accrued interest on bonds is recorded in the Statement of Activities when incurred; it is not recorded in governmental funds until it is paid:	
Accrued Interest Payable - Beginning of Year	2,363,957
Accrued Interest Payable - End of Year	(2,579,371)
Under the modified accrual basis of accounting used in the governmental funds, expenditures are not recognized for transactions that are not normally paid with expendable available financial resources. In the Statement of Activities, however, which is presented on the accrual basis of accounting, expenses and liabilities are reported regardless of when financial resources are available.	
Repayment of Bond Principal	1,535,000
Proceeds from School Loan Revolving Fund	(268,518)
Amortization of Deferred Charges and Bond Issuance Premium	90,629
Accumulated Sick Pay and Retirement Buyout are reported on the accrual method in the statement of activities, and recorded as an expenditure when financial resources are used in the governmental funds:	
Accumulated Sick Pay and Other Vested Benefits- Beginning of Year	668,913
Accumulated Sick Pay and Other Vested Benefits- End of Year	(617,206)
Retirement Buyout - Beginning of Year	318,284
Retirement Buyout - End of Year	(257,981)
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.	
Federal grants deferred using the modified accrual method	10,800
Deferred outflows and inflows of resources related to pensions and OPEB are applicable to future periods and, therefore, are not reported in the funds.	
Changes in Pension Related Items	(280,866)
Changes in OPEB Related Items	880
Restricted revenue reported in the governmental funds that is deferred to offset the deferred outflows related to Section 147 C pension and OPEB contributions subsequent to the measurement date	
Change in State Aid Funding for Pension and OPEB	9,708
CHANGE IN NET POSITION OF GOVERNMENTAL ACTIVITIES	$ 690,850

LIABILITIES	
Due to Groups and Organizations	60,636
NET POSITION	$ 0

The notes to the financial statements are an integral part of this statement.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The basic financial statements of the White Cloud Public Schools have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The more significant of the District's accounting policies are described below.

A. Reporting Entity

The School District ("the District") is located in Newaygo County with its administrative offices located in White Cloud, Michigan. The District operates under an elected 7-member board of education and provides services to its 966 students in elementary, middle school, high school, special education instruction, guidance, health, transportation, food service, and athletics. The District receives funding from local, state, and federal government sources and must comply with all of the requirements of these funding source entities. However, the District is not included in any other governmental reporting entity as defined by generally accepted accounting principles. Board members are elected by the public and have decision-making authority, the power to designate management, the ability to significantly influence operations, and the primary accountability for fiscal matters.

B. Description of Government-Wide Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report the information on all of the nonfiduciary activities of the primary government and its component units. All fiduciary activities are reported only in the fund financial statements. *Governmental activities*, which normally are supported by taxes, intergovernmental revenues, and other nonexchange transactions, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges to external customers for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable. The District does not have any business-type activities or component units.

C. Basis of Presentation – Government-Wide Financial Statements

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from the governmental funds. Separate financial statements are provided for governmental funds and fiduciary funds, even though the latter are excluded from the government-wide financial statements.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements.

D. Basis of Presentation – Fund Financial Statements

The fund financial statements provide information about the government's funds, including its fiduciary funds. Separate statements for each fund category – governmental and fiduciary – are presented. The emphasis of fund financial statements is on major governmental funds, each displayed in a separate column. All remaining governmental funds are aggregated and reported as nonmajor funds. Major individual governmental funds are reported as separate columns in the fund financial statements.

The District reports the following major governmental funds:

The *general fund* is the District's primary operating fund. It accounts for all financial resources of the District, except those required to be accounted for in another fund.

The *2016 school building and site fund* accounts for expenditures related to the 2016 bond issue.

Other Non-Major Funds:

The *special revenue (School Service) fund* accounts for revenue sources that are legally restricted to expenditures for specific purposes. The District accounts for its food service activities in a special revenue fund.

The *debt retirement funds* account for the resources accumulated and payments made for principal and interest on long-term general obligation debt of government funds.

The District reports the following fiduciary fund:

The *agency fund* is custodial in nature and does not present results of operations or have a measurement focus. Agency funds are accounted for using the accrual basis of accounting. This fund is used to account for assets that the District holds for others in an agency capacity.

During the course of operations the government has activity between funds for various purposes. Any residual balances outstanding at year-end are reported as due from/to other funds and advances to/from other funds. While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Balances between the funds included in governmental activities are eliminated so that only the net amount is included as internal balances in the governmental activities column.

Further, certain activity occurs during the year involving transfers of resources between funds. In fund financial statements these amounts are reported at gross amounts as transfers in/out. While reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Transfers between the funds included in governmental activities are eliminated so that only the net amount is included as transfers in the governmental activities column.

E. Measurement Focus and Basis of Accounting

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured such as *current financial resources* or *economic resources*. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences, and claims and judgments, are recorded only when payment is due. General capital asset acquisitions are reported as expenditures in governmental funds. Issuance of long-term debt and acquisitions under capital leases are reported as other financing sources.

Property taxes, state and federal aid, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Entitlements are recorded as revenues when all eligibility requirements are met, including any time requirements, and the amount is received during the period or within the availability period for this revenue resource (within 60 days of year-end). Expenditure-driven grants are recognized as revenue when the qualifying expenditures have been incurred and all other eligibility requirements have been met, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year-end). All other revenue items are considered to be measurable and available only when cash is received by the government.

The agency fund has no measurement focus but utilizes the *accrual basis of accounting* for reporting its assets and liabilities.

F. Budgetary Information

1. Budgetary Basis of Accounting

Budgets are adopted on a basis consistent with accounting principles generally accepted in the United States of America. Annual appropriated budgets are adopted for the general and special revenue funds.

Appropriations in all budgeted funds lapse at the end of the fiscal year even if they have related encumbrances. Encumbrances represent commitments related to unperformed contracts for goods or services. Encumbrance accounting - under which purchase orders, contracts and other commitments for the expenditure of resources are recorded to reserve that portion of the applicable appropriation - is utilized in the governmental funds. While all appropriations and encumbrances lapse at year-end, valid outstanding encumbrances (those for which performance under the executory contract is expected in the next year) are re-appropriated and become part of the subsequent year's budget pursuant to state regulations.

The District follows these procedures in establishing the budgetary data reflected in the financial statements:

a) Prior to July 1, the business office submits to the School Board a proposed operating budget for the fiscal year commencing on July 1.

b) A public hearing is conducted during June to obtain taxpayer comments.

c) Prior to June 30, the budget is legally adopted by the School Board resolution pursuant to the Uniform Budgeting and Accounting Act. The Act requires that the budget be amended prior to the end of the fiscal year, when necessary, to adjust appropriations if it appears that revenues and other financial sources will be less than anticipated, or so that expenditures will not be in excess of original estimates. Expenditures shall not be made or incurred, unless authorized in the budget, in excess of the amount appropriated.

d) The superintendent is charged with general supervision of the budgets and shall hold the department heads responsible for performance of their responsibilities.

e) For purposes of meeting emergency needs of the school district, transfer of appropriations may be made by the authorization of the superintendent. Such transfers of appropriations must be approved by the Board of Education at its next regularly scheduled meeting.

f) During the year the budgets are monitored and amendments to the budget resolution are made when it is deemed necessary.

g) Budgeted amounts are as originally adopted on June 26, 2017, or as amended by the School Board of Education throughout the year.

2. Excess of Expenditures Over Appropriations

General Fund

Instruction

a) Added Needs expenditures of $2,022,976 exceeded appropriations by $30,246.

Supporting Services

a) Pupil expenditures of $414,506 exceeded appropriations by $10,352.

b) Instructional Staff expenditures of $44,008 exceeded appropriations by $6,713.

c) Business expenditures of $224,308 exceeded appropriations by $672.

d) Pupil Transportation Services expenditures of $756,535 exceeded appropriations by $11,096.

Community Services

a) Welfare Activities expenditures of $275 exceeded appropriations by $275.

These overages were funded by savings in other expenditure areas compared to budget.

G. Assets, Liabilities, Deferred Outflows/Inflows of Resources, and Net Position/Fund Balance

1. Cash and Cash Equivalents

The District's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments. The District considers all highly liquid investments (including certificates of deposit) to be cash equivalents.

2. *Investments*

Investments are carried at amortized cost which approximates fair value. The District complies with State statutes regarding investment of funds.

The Board policy on investment of funds authorizes the School District to invest as follows:

(a) Bonds, bills, or notes of the United States, or obligations, the principal and interest of which are fully guaranteed by the United States.

(b) Certificates of deposit issued by any state or national bank organized and authorized to operate in this state.

(c) Commercial paper rated prime at the time of purchase and maturing not more than 270 days after the date of purchase.

(d) Securities issued or guaranteed by agencies or instrumentalities of the United States.

(e) United States government or federal agency obligation repurchase agreements.

(f) Bankers' acceptances issued by a bank that is a member of the Federal Deposit Insurance Corporation (FDIC).

(g) Mutual funds composed entirely of investment vehicles that are legal for direct investment by a school district.

(h) Investment pools, as authorized by the Surplus Funds Investment Pool Act, Act No. 367 of the Public Acts of 1982, being sections 129.111 to 129.118 of the Michigan Compiled Laws, composed entirely of instruments that are legal for direct investment by a school district.

The District's deposits and investments are held separately by several of the School District's funds.

3. *Inventory and Prepaid Items*

Inventory is valued at cost using the first-in-first-out method. Inventory consists of expendable supplies held for consumption, which are recorded as expenditures when consumed rather than when purchased.

Certain payments made to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both the government-wide and fund financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased.

The nonspendable fund balance at the governmental fund level is equal to the amount of inventories and prepaid items at year-end to indicate the portion of the governmental fund balances that are nonspendable.

4. *Capital Assets*

Capital assets purchased or acquired are capitalized at historical cost or estimated historical cost. Donated capital assets are valued at their acquisition value on the date received.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized. Improvements are capitalized and depreciated over the remaining useful lives of the related capital assets. Land is not depreciated and construction in progress is not depreciated until the underlying assets are placed in service upon completion of the project. At that time, the asset costs are reclassified out of construction in progress and into the appropriate depreciable category.

Depreciation on all assets is provided on the straight-line basis over the estimated useful lives as follows:

Buildings, Additions and Improvements	20-50 years
Furniture, Vehicles and Equipment	5-15 years

The District's capitalization policy is to capitalize individual amounts exceeding $5,000 and aggregate purchases of similar items purchased at the same time, such as textbooks for a classroom.

5. *Deferred Outflows/Inflows of Resources*

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The District has three items that qualify for reporting in this category. One is the deferred charge on refunding reported in the government-wide *Statement of Net Position*. A deferred charge on refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or funding debt. The other deferred outflows relate to the pension plan and other postemployment benefits for its employees. Details can be found in footnotes 3.E and 3.F.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. The separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The District has two items that qualifies for reporting in this category, which is related to the pension plan for its employees. Details can be found in footnotes 3.E and 3.F.

6. *Defined Benefit Plans*

For purposes of measuring the net pension and other postemployment benefits liabilities, deferred outflows of resources and deferred inflows of resources related to pensions and other postemployment benefits, and pension and other postemployment benefits expense, information about the fiduciary net position of the Michigan Public School Employees' Retirement System (MPSERS) and additions to/deductions from MPSERS fiduciary net position have been determined on the same basis as they are reported by MPSERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

7. Unearned and Unavailable Revenue

Unearned revenue arises when resources are received by the District before it has a legal claim to them. In subsequent periods, when both revenue recognition criteria are met, or when the government has a legal claim to the resources, revenue is recognized. The District has unearned revenue related to state and local grants received and unspent due to restrictions on how they can be spent.

Unavailable revenue arises when resources that the government has a legal claim to are received or expected to be received after 60 days from the current fiscal year end. At the modified accrual level, unavailable resources do not meet both the revenue recognition criteria since they are not considered available. The District has unavailable revenue related to federal meal reimbursements for the month of June that as of the date of the audit report was not received and therefore considered to be unavailable.

8. Long-Term Obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities statement of net position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the straight line method which approximates the effective interest method over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuance are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

9. Net Position Flow Assumption

Sometimes the District will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position in the government-wide financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the District’s policy to consider restricted – net position to have been depleted before unrestricted – net position is applied.

10. Fund Balance Flow Assumption

Sometimes the District will fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements a flow assumption must be made about the order in which the resources are considered to be applied. It is the District’s policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

11. Fund Balance Policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The District itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the District's highest level of decision-making authority. The governing board is the highest level of decision-making authority for the government that can, by adoption of a resolution prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the resolution remains in place until a similar action is taken (the adoption of another resolution) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the District for specific purposes but do not meet the criteria to be classified as committed. The governing board has authorized the superintendent or business manager to assign fund balance. The board may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

12. Use of Estimates

The process of preparing basic financial statements in conformity with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions regarding certain types of assets, liabilities, revenues, and expenditures. Such estimates primarily relate to unsettled transactions and events as of the date of the financial statements. Accordingly, upon settlement, actual results may differ from estimated amounts.

H. Revenues and Expenditures/Expenses

1. State Revenue

The State of Michigan utilizes a foundation grant approach which provides for a specific annual amount of revenue per pupil based on a statewide formula. The Foundation is funded from state and local sources. Revenues from state sources are primarily governed by the School Aid Act and the School Code of Michigan. The Michigan Department of Education administers the allocation of state funds to school districts based on information supplied by the districts. For the year ended June 30, 2018 the foundation allowance was based on pupil membership counts taken in February of 2017 and October of 2017. For fiscal year ended June 30, 2018, the per pupil foundation allowance was $7,631 for White Cloud Public Schools.

The state portion of the foundation is provided primarily by a state education property tax millage of 6 mills and an allocated portion of state sales and other taxes. The local portion of the foundation is funded primarily by non-homestead property taxes, which may be levied at a rate of up to 18 mills. The State revenue is recognized during the foundation period and is funded through payments from October 2017 to August 2018. Thus, the unpaid portion at June 30th is reported as due from other governmental units.

The District also receives revenue from the state to administer certain categorical education programs. State rules require that revenue earmarked for these programs be used for its specific purpose. Certain governmental funds require an accounting to the state of the expenditures incurred. For categorical funds meeting this requirement, funds received, which are not expended by the close of the fiscal year are recorded as unearned revenue. Other categorical funding is recognized when the appropriation is received.

2. Federal Revenue

Expenditure-driven grants are recognized as revenue when the qualifying expenditures have been incurred and all other grant requirements have been met.

3. Program Revenues

Amounts reported as program revenue include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. All taxes, including those dedicated for specific purposes, state foundation aid, certain revenue from the intermediate school district and other unrestricted items are not included as program revenue but instead as *general revenues*.

4. Property Taxes

Property taxes levied by the District are collected by various municipalities and periodically remitted to the District. The taxes are billed as of December 1. The due date is February 14, after which time the bills become delinquent and penalties and interest may be assessed by the collecting entity.

For the year ended June 30, 2018, the District levied the following amounts per $1,000 of taxable valuation:

Fund	Mills
General Fund - Non-Principal Residence Exemption (PRE)	18.0000
General Fund - Commercial Personal Property	6.0000
Debt Service Funds - PRE, Non-PRE, Commercial Personal Property	9.5000

5. Compensated Absences

It is the District’s policy to permit employees to accumulate earned but unused sick pay, vacation time and other benefits. The amount allowable to be compensated for depends on the position and the longevity of the individual employee. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

NOTE 2 – STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

A. Violations of Legal or Contractual Provisions

Note 1.F.2, on the Excess of Expenditures Over Appropriations, describes a budgetary violation that occurred for the year ended June 30, 2018.

NOTE 3 – DETAILED NOTES ON ALL ACTIVITIES AND FUNDS

A. Deposits and Investments

Custodial credit risk – deposits. In the case of deposits, this is the risk that in the event of a bank failure, the government's deposits may not be returned to it. As of June 30, 2018, $129,892 of the District's bank balance of $580,642 was exposed to custodial credit risk because it was uninsured and uncollateralized. The risk is spread amongst the District's funds. Although the District's investment policy does not directly address custodial credit risk, it typically limits its exposure by purchasing insured or registered investments or by controlling who holds the deposits.

Interest rate risk. In accordance with its investment policy, the District will minimize interest rate risk, which is the risk that the market value of securities in the portfolio will fall due to changes in market interest rates, by structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations, thereby avoiding the need to sell securities in the open market; and, investing operating funds primarily in shorter-term securities, liquid asset funds, money market mutual funds, or similar investment pools and limiting the average maturity in accordance with the District's cash requirements.

Credit risk. State law limits investments in commercial paper and corporate bonds to a prime or better rating issued by nationally recognized statistical rating organizations (NRSOs).

Concentration of credit risk. The District will minimize concentration of credit risk, which is the risk of loss attributed to the magnitude of the District's investment in a single issuer, by diversifying the investment portfolio so that the impact of potential losses from any one type of security or issuer will be minimized.

Foreign currency risk. The District is not authorized to invest in investments which have this type of risk; therefore, it is not addressed in the investment policy.

Custodial credit risk – investments. For an investment, this is the risk that, in the event of the failure of the counterparty, the government will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. Although the District's investment policy does not directly address custodial credit risk, it typically limits its exposure by purchasing insured or registered investments or by controlling who holds the investments.

As of June 30, 2018, the District had the following investments:

	Fair Value	Weighted Average Maturity (Years)	Standard & Poor's Rating	%
Repurchase Agreements	$ 494,573	0.0661	AAAm	47.59%
U.S. Government Agency Securities	472,615	0.0632	AAAm	45.47%
U.S. Treasury Securities	72,147	0.0096	AAAm	6.94%
	$ 1,039,335			100.00%
Portfolio Weighted Average Maturity		0.0609		

The District invests in the Federated Government Obligations Mutual Fund which is made up of the type of investments listed in the table above. The fund operates as a government money market fund. As a government money market fund, the fund: 1) invests at least 99.5% of its total assets in cash, securities issued or guaranteed by the United States or certain U.S. government agencies or instrumentalities; and/or repurchase agreements that are collateralized fully; 2) generally continues to use amortized cost, which approximates fair value, to value its portfolio securities and transact at a stable $1.00 net asset value (NAV); and 3) has elected not to be subject to the liquidity fees and gates requirement at this time as permitted by Rule 2a-7 under the Act.

Fair Market Value Disclosure - The District is required to disclose amounts within a framework established for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1: Quoted prices in active markets for identical securities.

Level 2: Prices determined using other significant observable inputs. Observable inputs are inputs that reflect the assumptions market participants would use in pricing a security and are developed based on market data obtained from sources independent of the reporting entity. These may include quoted prices from similar activities, interest rates, prepayment speeds, credit risk, and others. Debt securities are valued in accordance with evaluated bid price supplied by the pricing service and generally categorized as Level 2 in the hierarchy. Securities that are categorized as Level 2 in the hierarchy include, but are not limited to, repurchase agreements, U.S. government agency securities, corporate securities, and commercial paper.

Level 3: Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable or deemed less relevant (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the reporting entity's own assumptions about the factors market participants would use in pricing the security and would be based on the best information available under the circumstances.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. There are two types of valuation techniques most commonly used and vary depending on the level of investment. These two techniques are the market approach and income approach. The market approach uses prices and other relevant information generated by the market transactions involving identical or similar assets and liabilities. The income approach discounts future amounts to a single current amount and the discount rate used in the process should reflect current market expectations about risks associated with those future cash flows.

The Districts investments in the Federated Government Obligations Mutual Fund are subject to fair value measurement and are categorized as Level 2.

The carrying amount of deposits and investments is as follows:

	Total
Deposits – including Fiduciary Funds of $60,636	$ 568,323
Investments	1,039,335
	$ 1,607,658

The above amounts are reported in the financial statements as follows:

	Total
Cash - Fiduciary Funds	$ 60,636
Cash - District-Wide	507,687
Investments	1,039,335
	$ 1,607,658

B. Receivables

Receivables as of year-end for the government's individual major funds and nonmajor are as follows:

	General	Nonmajor and Other Funds	Total
Receivables			
Accounts	$ 41,401	$ 0	$ 41,401
Due from Other Governmental Units	1,515,018	277	1,515,295
Total Receivables	$ 1,556,419	$ 277	$1,556,696

Amounts due from other governments include amounts due from federal, state, and local sources for various projects and programs.

No allowance for doubtful accounts has been recorded.

C. Capital Assets

Capital assets activity for the year ended June 30, 2018, was as follows:

	Balance June 30, 2017	Additions	Deletions	Balance June 30, 2018
Assets Not Being Depreciated				
Land	$ 177,656	$ 0	$ 0	$ 177,656
Construction in Progress	2,358,263	0	2,358,263	0
Subtotal	2,535,919	0	2,358,263	177,656
Other Capital Assets:				
Land Improvements	1,109,618	37,738	0	1,147,356
Buildings and Additions	20,514,290	4,040,045	0	24,554,335
Furniture and Equipment	2,961,372	2,851,765	840,169	4,972,968
Textbooks and Library Books	55,285	0	0	55,285
Other Vehicles	238,157	0	26,966	211,191
Buses	636,958	0	199,415	437,543
Subtotal	25,515,680	6,929,548	1,066,550	31,378,678
Less Accumulated Depreciation for:				
Land Improvements	544,065	45,638	0	589,703
Buildings and Additions	6,566,519	383,647	0	6,950,166
Furniture and Equipment	2,212,561	224,568	840,169	1,596,960
Textbooks and Library Books	55,285	0	0	55,285
Other Vehicles	180,278	8,512	26,966	161,824
Buses	592,742	10,053	199,415	403,380
Accumulated Depreciation	10,151,450	672,418	1,066,550	9,757,318
Net Other Capital Assets	15,364,230	6,257,130	0	21,621,360
Net Capital Assets	$ 17,900,149	$ 6,257,130	$ 2,358,263	$ 21,799,016

Depreciation for the fiscal year ended June 30, 2018, amounted to $672,418. The District determined that it was impractical to allocate depreciation to the various governmental activities as the assets serve multiple functions.

D. Retirement and Post-Employment Benefits

Plan Description – The Michigan Public School Employees' Retirement System (System or MPSERS) is a cost-sharing, multiple employer, state-wide, defined benefit public employee retirement plan governed by the State of Michigan (State) originally created under Public Act 136 of 1945, recodified and currently operating under the provisions of Public Act 300 of 1980, as amended. Section 25 of this act establishes the board's authority to promulgate or amend the provisions of the System. MPSERS issues a publicly available Comprehensive Annual Financial Report that can be obtained at www://michigan.gov/mpsers-cafr.

The System is administered by the Office of Retirement Services (ORS) within the Michigan Department of Technology, Management & Budget. The Department Director appoints the Office Director, with whom the general oversight of the System resides. The State Treasurer serves as the investment officer and custodian for the System.

Benefits Provided- Overall

Introduction

Participants are enrolled in one of multiple plans based on date of hire and certain voluntary elections. A summary of the pension plans offered by MPSERS is as follows:

Plan Name	Plan Type	Plan Status
Basic	Defined Benefit	Closed
Member Investment Plan (MIP)	Defined Benefit	Closed
Pension Plus	Hybrid	Closed
Pension Plus 2	Hybrid	Open
Defined Contribution	Defined Contribution	Open

Benefits Provided – Pension

Benefit provisions of the defined benefit pension plan are established by State statute, which may be amended. Public Act 300 of 1980, as amended, establishes eligibility and benefit provisions for the defined benefit (DB) pension plan. Retirement benefits for DB plan members are determined by final average compensation and years of service. DB members are eligible to receive a monthly benefit when they meet certain age and service requirements. The System also provides disability and survivor benefits to DB plan members.

Prior to pension reform of 2010 there were two plans commonly referred to as Basic and Member Investment Plan (MIP). Basic plan member's contributions range from 0% to 4%. On January 1, 1987, the Member Investment Plan (MIP) was enacted. MIP members enrolled prior to January 1, 1990 contribute at a permanently fixed rate of 3.9% of gross wages. Members first hired January 1, 1990 or later, including Pension Plus plan members, contribute at various graduated permanently fixed contribution rates from 3.0% to 7.0%.

Pension Reform 2010

On May 19, 2010, the Governor signed Public Act 75 of 2010 into law. As a result, any member of the Michigan Public School Employees' Retirement System (MPSERS) who became a member of MPSERS after June 30, 2010 is a Pension Plus member. Pension Plus is a hybrid plan that contains a pension component with an employee contribution (graded, up to 6.4% of salary) and a flexible and transferable defined contribution (DC) tax-deferred investment account that earns an employer match of 50% (up to 1% of salary) on employee contributions. Retirement benefits for Pension Plus members are determined by final average compensation and years of service. Disability and survivor benefits are available to Pension Plus members.

Pension Reform 2012

On September 4, 2012, the Governor signed Public Act 300 of 2012 into law. The legislation grants all active members who first became a member before July 1, 2010 and who earned service credit in the 12 months ending September 3, 2012, or were on an approved professional services or military leave of absence on September 3, 2012, a voluntary election regarding their pension. Any changes to a member's pension are effective as of the member's *transition date*, which is defined as the first day of the pay period that begins on or after February 1, 2013.

Under the reform, members voluntarily chose to increase, maintain, or stop their contributions to the pension fund.

An amount determined by the member's election of Option 1, 2, 3, or 4 described below.

Option 1 – Members voluntarily elected to increase their contributions to the pension fund as noted below and retain the 1.5% pension factor in their pension formula. The increased contribution would begin as of their transition date and continue until terminate public school employment.

- Basic plan members: 4% contribution
- Member Investment Plan (MIP)-Fixed, MIP-Graded, and MIP-Plus members: a flat 7% contribution

Option 2 – Members voluntarily elected to increase their contribution to the pension fund as stated in Option 1 and retain the 1.5% pension factor in their pension formula. The increased contribution would begin as of their transition date and continue until they reach 30 years of service. If and when they reach 30 years of service, their contribution rates will return to the previous level in place as of the day before their transition date (0% for Basic plan members, 3.9% for MIP-Fixed, up to 4.3% for MIP-Graded, or up to 6.4% for MIP-Plus). The pension formula for any service their after would include a 1.25% pension factor.

Option 3 – Members voluntarily elected not to increase their contribution to the pension fund and maintain their current level of contribution to the pension fund. The pension formula for their years of service as of the day before their transition date will include a 1.5% pension factor. The pension formula for any service thereafter will include a 1.25% pension factor.

Option 4 – Members voluntarily elected to no longer contribute to the pension fund and therefore are switched to the Defined Contribution plan for future service as of their transition date. As a DC participant they receive a 4% employer contribution to the tax-deferred 401(k) account and can choose to contribute up to the maximum amounts permitted by the IRS to a 457 account. They vest in employer contributions and related earnings in their 401(k) account based on the following schedule: 50% at 2 years, 75% at 3 years, and 100% at 4 years of service. They are 100% vested in any personal contributions and related earnings in their 457 accounts. Upon retirement, if they meet age and service requirements (including their total years of service), they would also receive a pension (calculated based on years of service and final average compensation as of the day before their transition date and a 1.5% pension factor).

Members who did not make an election before the deadline defaulted to Option 3 as described above. Deferred or nonvested public school employees on September 3, 2012, who return to public school employment on or after September 4, 2012, will be considered as if they had elected Option 3 above. Returning members who made the retirement plan election will retain whichever option they chose.

Employees who first work on or after September 4, 2012 choose between two retirement plans: the Pension Plus Plan and a Defined Contribution Plan that provides a 50% employer match up to 3% of salary on employee contributions.

Final Average Compensation (FAC) – Average of highest 60 consecutive months (36 months for MIP members). FAC is calculated as of the last day worked unless the member elected option 4, in which case the FAC is calculated at the transition date.

Pension Reform of 2017

On July 13, 2017, the Governor signed Public Act 92 of 2017 into law. The legislation closes the current hybrid plan (Pension Plus) to newly hired employees as of February 1, 2018 and creates a new optional revised hybrid plan with similar plan benefit calculations but containing a 50/50 cost share between the employee and the employer, including the cost of future unfunded liabilities. The assumed rate of return on the new hybrid plan is 6%. Further, the law provides that, under certain conditions, the new hybrid plan would close to new employees if the actuarial funded ratio falls below 85% for two consecutive years. The law includes other provisions to the retirement eligibility age, plan assumptions, and unfunded liability payment methods.

Benefits Provided – Other postemployment benefit (OPEB)

Benefit provisions of the postemployment healthcare plan are established by State statute, which may be amended. Public Act 300 of 1980, as amended, establishes eligibility and benefit provisions. Retirees have the option of health coverage, which, through 2012, was funded on a cash disbursement basis. Beginning fiscal year 2013, it is funded on a prefunded basis. The System has contracted to provide the comprehensive group medical, prescription drug, dental and vision coverage for retirees and beneficiaries. A subsidized portion of the premium is paid by the System with the balance deducted from the monthly pension of each retiree healthcare recipient. For members who first worked before July 1, 2008, (Basic, MIP-Fixed, and MIP-Graded plan members), the subsidy is the maximum allowed by statute. To limit future liabilities of Other Postemployment Benefits, members who first worked on or after July 1, 2008, (MIP-Plus plan members), have a graded premium subsidy based on career length where they accrue credit towards their insurance premiums in retirement, not to exceed the maximum allowable by statute. Public Act 300 of 2012 sets the maximum subsidy at 80% beginning January 1, 2013; 90% for those Medicare eligible and enrolled in the insurances as of that date.

Retiree Healthcare Reform of 2012

Public Act 300 of 2012 granted all active members of the Michigan Public School Employees Retirement System, who earned service credit in the 12 months ending September 3, 2012, or were on an approved professional services or military leave of absence on September 3, 2012, a voluntary election regarding their retirement healthcare. Any changes to a member's healthcare benefit are effective as of the member's *transition date*, which is defined as the first day of the pay period that begins on or after February 1, 2013.

Under Public Act 300 of 2012, members were given the choice between continuing the 3% contribution to retiree healthcare and keeping the premium subsidy benefit described above, or choosing not to pay the 3% contribution and instead opting out of the subsidy benefit and becoming a participant in the Personal Healthcare Fund (PHF), a portable, tax-deferred fund that can be used to pay healthcare expenses in retirement. Participants in the PHF are automatically enrolled in a 2% employee contribution into their 457 account as of their transition date, earning them a 2% employer match into a 401(k) account. Members who selected this option stop paying the 3% contribution to retiree healthcare as of the day before their transition date, and their prior contributions will be deposited into their 401(k) accounts.

Regular Retirement (no reduction factor for age)

Eligibility – A basic plan member may retire at age 55 with 30 years credited service; or age 60 with 10 years credited service. For Member Investment Plan (MIP) members, age 46 with 30 years credited service; or age 60 with 10 years credited service; or age 60 with 5 years of credited service provided member worked through 60^{th} birthday and has credited service in each of the last 5 years. For Pension Plus Plan (PPP) members, age 60 with 10 years of credited service.

Annual Amount – The annual pension is paid monthly for the lifetime of a retiree. The calculation of a member's pension is determined by their pension election under PA 300 of 2012.

Members Contributions

Depending on the plan selected, member contributions range from 0% to 7% for pension and 0% to 3% for other postemployment benefits. Plan members electing the defined contribution plan are not required to make additional contributions.

Employer Contributions

Employers are required by Public Act 300 of 1980, as amended, to contribute amounts necessary to finance the coverage of members and retiree other postemployment benefits (OPEB). Contribution provisions are specified by State statute and may be amended only by action of the State Legislature.

Employer contributions to the System are determined on an actuarial basis using the entry age normal actuarial cost method. Under this method, the actuarial present value of the projected benefits of each individual included in the actuarial valuation is allocated on a level basis over the service of the individual between entry age and assumed exit age. The portion of this cost allocated to the current valuation year is called the normal cost. The remainder is called the actuarial accrued liability. Normal cost is funded on a current basis.

For retirement and OPEB benefits, the unfunded (overfunded) actuarial accrued liability as of September 30, 2016 valuation will be amortized over a 22-year period for fiscal 2017.

School districts' contributions are determined based on employee elections. There are several different benefit options included in the plan available to employees based on date of hire. Contribution rates are adjusted annually by the ORS. The range of rates is as follows:

	Pension	Other Postemployment Benefit
October 1, 2016 - September 30, 2017	15.27% - 19.03%	5.69% - 5.91%
October 1, 2017 - September 30, 2018	13.54% - 19.74%	7.42% - 7.67%

The District's pension contributions for the year ended June 30, 2018 were equal to the required contribution total. Pension contributions were approximately $1,349,836.

The District's OPEB contributions for the year ended June 30, 2018 were approximately $311,465.

These amounts, for both pension and OPEB, include contributions funded from state revenue Section 147c restricted to fund MPSERS Unfunded Actuarial Accrued Liability (UAAL) Stabilization Rate (100% for pension and 0% for OPEB).

E. Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

Pension Liabilities

At June 30, 2018, the District reported a liability of $14,356,153 for its proportionate share of the net pension liability. The net pension liability was measured as of September 30, 2017, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation date of September 30, 2016 and rolled-forward using generally accepted actuarial procedures. The District's proportion of the net pension liability was based on a projection of its long-term share of contributions to the pension plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2017 and 2016, the District's proportion was .0553987% and .0501141%.

MPSERS (Plan) Non-University Employers Net Pension Liability – As of September 30, 2017 and September 30, 2016

	September 30, 2017	September 30, 2016
Total Pension Liability	$ 72,407,218,688	$ 67,917,445,078
Plan Fiduciary Net Position	46,492,967,573	42,968,263,308
Net Pension Liability	$ 25,914,251,115	$ 24,949,181,770
Plan Fiduciary Net Position as a Percentage of Total Pension Liability	64.21%	63.27%
Net Pension Liability as a Percentage of Covered Payroll	309.13%	295.81%

Pension Expense and Deferred Inflows and Outflows of Resources Related to Pensions

For the year ended June 30, 2018, the District recognized total pension expense of $1,059,955. This amount excludes contributions funded from state revenue Section 147c restricted to fund the MPSERS Unfunded Actuarial Accrued Liability (UAAL) Stabilization Rate.

At June 30, 2018, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	$ 124,765	$ 70,443
Section 147c revenue related to District Pension contributions subsequent to measurement date	0	570,747
Changes of assumptions	1,572,831	0
Net difference between projected and actual earnings on pension plan investments	0	686,319
Changes in proportion and differences between District contributions and proportionate share of contributions	806,748	194,154
District contributions subsequent to the measurement date	1,240,403	0
Total	$ 3,744,747	$ 1,521,663

$1,240,403 reported as deferred outflows of resources and $570,747 reported as deferred inflows or resources related to pensions resulting from District contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2019. Other amounts reported as deferred outflows of resources (+) and deferred inflows of resources (-) related to pensions will be recognized in pension expense as follows:

Year Ended September 30,	Amount
2018	$ 422,403
2019	691,569
2020	419,320
2021	20,136
	$ 1,553,428

F. OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

OPEB Liabilities

At June 30, 2018, the District reported a liability of $4,891,908 for its proportionate share of the net OPEB liability. The net OPEB liability was measured as of September 30, 2017, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation date of September 30, 2016 and rolled-forward using generally accepted actuarial procedures. The District's proportion of the net OPEB liability was based on a projection of its long-term share of contributions to the OPEB plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2017, the District's proportion was 0.0552417%.

MPSERS (Plan) Non-University Employers Net OPEB Liability – As of September 30, 2017 and September 30, 2016

	September 30, 2017	September 30, 2016
Total OPEB Liability	$ 13,920,945,991	$ 14,071,279,615
Plan Fiduciary Net Position	5,065,474,948	4,730,719,539
OPEB Liability	$ 8,855,471,043	$ 9,340,560,076
Plan Fiduciary Net Position as a Percentage of Total OPEB Liability	36.39%	33.62%
OPEB Liability as a Percentage of Covered Payroll	105.64%	unknown

OPEB Expense and Deferred Inflows and Outflows of Resources Related to OPEB

For the year ended June 30, 2018, the District recognized total OPEB expense of $310,585.

At June 30, 2018, the District reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	$ 0	$ 52,084
Changes of assumptions	0	0
Net difference between projected and actual earnings on OPEB plan investments	0	113,298
Changes in proportion and differences between District contributions and proportionate share of contributions	2,849	0
District contributions subsequent to the measurement date	288,350	0
Total	$ 291,199	$ 165,382

$288,350 reported as deferred outflows of related to OPEB resulting from District contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability in the year ended June 30, 2019. Other amounts reported as deferred outflows of resources (+) and deferred inflows of resources (-) related to OPEB will be recognized in OPEB expense as follows:

Year Ended September 30,		Amount
2018	$	(39,328)
2019		(39,328)
2020		(39,328)
2021		(39,328)
2022		(5,221)
	$	(162,533)

G. Actuarial Valuations and Assumptions of the Pension and OPEB Plans

Investment rate of return for Pension – 7.5% a year, compounded annually net of investment and administrative expenses for the Non-Hybrid groups and 7.0% a year, compounded annually net of investment and administrative expenses for the Hybrid group (Pension Plus Plan).

Investment rate of return for OPEB – 7.5% a year, compounded annually net of investment and administrative expenses.

Salary increases - The rate of pay increase used for individual members is 3.5%.

Inflation – 3.0%

Mortality assumptions - RP2000 Combined Healthy Life Mortality table, adjusted for mortality improvements to 2025 using projection scale BB (for men, 80% of the table rates were used and for women, 70% of the table rates were used).

Experience study - The annual actuarial valuation report of the System used for these statements is dated September 30, 2016. Assumption changes as a result of an experience study for the periods 2007 through 2012 have been adopted by the System for use in the annual pension valuations beginning with the September 30, 2014 valuation.

The long-term expected rate of return on pension and other postemployment benefit plan investments - The pension rate was 7.5% (7% Pension Plus Plan), and the other postemployment benefit rate was 7.5%, net of investment and administrative expenses was determined using a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Cost of Living Pension Adjustments – 3.0% annual non-compounded for MIP members.

Healthcare cost trend rate for other postemployment benefit – 7.5% for year one and graded to 3.5% to year twelve.

Additional assumptions for other postemployment benefit only – Applies to individuals hired before September 4, 2012:

Opt Out Assumption – 21% of eligible participants hired before July 1, 2008 and 30% of those hired after June 30, 2008 are assumed to opt out of the retiree health plan.

Survivor Coverage – 80% of male retirees and 67% of female retirees are assumed to have coverage continuing after the retiree's death.

Coverage Election at Retirement – 75% of male and 60% of female future retirees are assumed to elect coverage for 1 or more dependents.

The target asset allocation at September 30, 2017 and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Investment Category	**Target Allocation**	**Long-Term Expected Real Rate of Return ***
Domestic Equity Pools	28.00%	5.60%
Alternative Investment Pools	18.00%	8.70%
International Equity	16.00%	7.20%
Fixed Income Pools	10.50%	-0.10%
Real Estate & Infrastructure Pools	10.00%	4.20%
Absolute Return Pools	15.50%	5.00%
Short-Term Investment Pools	2.00%	-0.90%
	100%	

*Long-term rate of return are net of administrative expenses and 2.3% inflation.

Pension Discount Rate

A discount rate of 7.5% was used to measure the total pension liability (7.0% for the Pension Plus Plan). This discount rate was based on the long-term expected rate of return on pension plan investments of 7.5% (7.0% for the Pension Plus Plan). The projection of cash flows used to determine this discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

OPEB Discount Rate

The discount rate of 7.5% was used to measure the total OPEB liability. This discount rate was based on the long-term expected rate of return on OPEB plan investments of 7.5%. The projection of cash flows used to determine this discount rate assumed that plan member contributions will be made at the current contribution rate and that school districts contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the OPEB plan's fiduciary net position was project to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

Sensitivity of the District's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following presents the District's proportionate share of the net pension liability, calculated using the discount rate of 7.5% (7.0% for the Pension Plus Plan), as well as what the District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

1% Decrease (Non-Hybrid/Hybrid) 6.5% / 6.0%	Current Single Discount Rate Assumption (Non-Hybrid/Hybrid) 7.5% / 7.0%	1% Increase (Non-Hybrid/Hybrid) 8.5% / 8.0%
$ 18,701,292	$ 14,356,153	$ 10,697,822

Sensitivity of the District's Proportionate Share of the Net OPEB Liability to Changes in the Discount Rate

The following presents the Reporting Unit's proportionate share of the net OPEB liability calculated using the discount rate of 7.5%, as well as what the Reporting Unit's proportionate share of the net OPEB liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

1% Decrease 6.5%	Current Single Discount Rate Assumption 7.5%	1% Increase 8.5%
$ 5,729,839	$ 4,891,908	$ 4,180,768

Sensitivity of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rates

The following presents the Reporting Unit's proportionate share of the net other postemployment benefit liability calculated using the healthcare cost trend rate of 7.5% (decreasing to 3.5%), as well as what the Reporting Unit's proportionate share of the net other postemployment benefit liability would be if it were calculated using a healthcare cost trend rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

1% Decrease (6.5% decreasing to 2.5%	Current Healthcare Cost Trend Rates (7.5% decreasing to 3.5%)	1% Increase (8.5% decreasing to 4.5%)
$ 4,142,789	$ 4,891,908	$ 5,742,481

H. Pension and OPEB Plan Fiduciary Net Position

Detailed information about the pension and OPEB plan's fiduciary net position is available in the separately issued Michigan Public School Employees Retirement System 2017 Comprehensive Annual Financial Report.

I. Payables to the Pension and OPEB Plan

As of June 30, 2018, the District is current on all required pension and OPEB plan payments. As of June 30, 2018, the District reported payables in the amount of $291,195 to the pension and OPEB plan. These amounts represent current payments for June wages paid in July, accruals for summer pay primarily for teachers and also the contributions due funded from state revenue Section 147c restricted to fund the MPSERS Unfunded Actuarial Accrued Liability (UAAL) Stabilization Rate.

J. Risk Management

White Cloud Public Schools is exposed to various risks of loss related to property loss, torts, errors and omissions, employee injuries (workers' compensation) as well as medical benefits provided to employees.

The District participates in a distinct pool of education institutions within the State of Michigan for various risks of loss, including general liability, property and casualty, employee health and accident insurance, and workers' disability compensation. The pool is considered a public entity risk pools. The District pays annual premiums to each pool for the respective insurance coverage. In the event a pool's total claims and expenses for a policy year exceed the total normal annual premiums for said years, all members of the specific pool's policy year may be subject to special assessment to make up the deficiency. The District has not been informed of any special assessments being required.

K. Lease Information

Operating Leases. The District is committed under various noncancelable leases for office equipment and school buses. The leases are operating leases with no contingent lease payments. The equipment may be purchased at the end of the lease for fair market value. For the year ended June 30, 2018, rental expenditures were $233,123. Future minimum lease payments are as follows:

YEAR ENDED JUNE 30,	AMOUNT
2019	$ 232,182
2020	189,924
	$ 422,106

L. Short-Term Debt

On September 15, 2017, the District issued a State Aid Note in the amount of $1,200,000. The note matures on April , with interest at 1.50%. The District pledged its State Aid revenue for payment of this liability at maturity. The purpose of the note was to provide for cash flow needs at the beginning of the school year. Interest expense for the year was $12,521. As of June 4, 2018, The District has approved a note payable for the fiscal year ending June 30, 2019 in the amount of $1,200,000.

The following is a summary of the Short-Term Debt transactions for the District for the year ended June 30, 2018:

Short-Term Debt at July 1, 2017	$ 1,000,000
New Debt Issued	1,200,000
Debt Retired and Paid	(2,200,000)
Short-Term Debt at June 30, 2018	$ 0

M. Long-Term Liabilities

The District issues general obligation bonds to provide funds for the acquisition, construction and improvement of major capital facilities. General obligation bonds are direct obligations and pledge the full faith and credit of the District.

The following is a summary of the governmental long-term liability transactions for the District for the year ended June 30, 2018:

	SCHOOL BOND LOAN FUND LOAN	BONDS	ACCUMULATED UNPAID COMPENSATED ABSENCES AND RETIREMENT CONTRACTS	NET PENSION LIABILITY	NET OPEB LIABILITY	TOTAL
Debt Payable at Beginning of Year	$ 4,709,845	$ 15,030,000	$ 987,197	$ 13,365,953	$ 5,159,880	$ 39,252,875
Increase in Debt	268,518	0	50,383	2,289,593	162,107	2,770,601
Debt Retired	0	(1,535,000)	(162,393)	(1,299,393)	(430,079)	(3,426,865)
Debt Payable at End of Year	4,978,363	13,495,000	875,187	14,356,153	4,891,908	38,596,611
Less Current Portion	0	1,565,000	79,841	Unknown	Unknown	1,644,841
Net Long-Term Debt	$ 4,978,363	$ 11,930,000	$ 795,346	$ 14,356,153	$ 4,891,908	$ 36,951,770

At June 30, 2018, the District's general long-term debt consisted of the following issues:

School Bond Loan Fund Loan beginning April 26, 2002. This is a loan from the State of Michigan pursuant to P.A. 108 of 1961. The District's debt retirement millage is limited to 9.50 mills. As long as the tax revenue from this millage is insufficient to make current debt service payments on the District's bonds, additional loans can be obtained in amounts sufficient to make bond and interest payments. No payments are due on the School Bond Loan Fund loan or accrued interest until such time as tax revenues exceed bond debt service requirements. Interest rates on these loans are variable, the rate at June 30, 2018, was 3.10164%, and the accrued interest was $2,494,800 which is not included in the total.	$ 4,978,363
$7,620,000 2015 Refunding Bonds due in annual installments of $500,000 through May 1, 2031; Interest at 4.000%.	6,500,000
$3,505,000 2013 Refunding Bonds due in annual installments of $630,000 to $665,000 through May 1, 2020; Interest at 1.500%.	1,295,000
$6,310,000 2016 School Building and Site Bonds due in annual installments of $400,000 to $450,000 through May 1, 2031; Interest at 4.000%	5,700,000
Accumulated Unpaid Compensated Absences and Retirement Contracts	875,187
Net Pension Liability	14,356,153
Net Other Postemployment Benefit Liability	4,891,908
	$ 38,596,611

The annual requirements to amortize all general long-term debt outstanding except compensated absences, net pension and OPEB liabilities, and the School Bond Loan Fund loan as of June 30, 2018, are as follows:

YEAR ENDING	RETIREMENT PAYABLE		BONDS PAYABLE		
JUNE 30,	PRINCIPAL	INTEREST	PRINCIPAL	INTEREST	TOTAL
2019	$ 79,937	$ 0	$ 1,565,000	$ 507,425	$ 2,152,362
2020	65,804	0	1,530,000	461,450	2,057,254
2021	58,625	0	925,000	416,000	1,399,625
2022	43,538	0	925,000	379,000	1,347,538
2023	10,077	0	950,000	342,000	1,302,077
2024-2028	0	0	4,750,000	1,140,000	5,890,000
2029-2033	0	0	2,850,000	228,000	3,078,000
	$ 257,981	$ 0	$13,495,000	$ 3,473,875	$ 17,226,856

The annual requirements to amortize the accumulated unpaid compensated absences, net pension liability, net other postemployment benefit liability, and the School Bond Loan Fund loan are not included above because it is unknown when they will actually be paid.

Compensated absences and retirement contracts will be paid by the fund in which the employee worked, including the general fund and other governmental funds. Accrued interest on School Bond Loan Fund of $2,494,800 is treated as a long-term liability because it is not known when it will actually be paid.

N. Interfund Receivables and Payables

Interfund Receivables and Payables as shown in the individual fund financial statements at June 30, 2018, were:

	INTERFUND RECEIVABLES	INTERFUND PAYABLE
General Fund	$ 10,051	$ 7,256
Food Service Fund	0	10,051
2013 Debt Fund	2,800	0
2015 Debt Fund	1,956	0
2016 Debt Fund	2,500	0
	$ 17,307	$ 17,307

The outstanding balances between funds result mainly from the time lag between the dates that (1) interfund goods and services are provided or reimbursable expenditures occur, (2) transactions are recorded in the accounting system, and (3) payments between funds are made. All interfund balances outstanding at June 30, 2018, are expected to be repaid within one year.

O. Interfund Transfers

Interfund transfers are as shown in the individual fund financial statements at June 30, 2018, were:

	TRANSFERS IN	TRANSFERS OUT
General Fund	$ 28,000	$ 0
School Service Fund - Food Service Fund	0	28,000
	$ 28,000	$ 28,000

Transfers are used to (1) move revenues from the fund that is required to collect them to the fund that is required or allowed to expend them; (2) move receipts restricted to or allowed for debt service from the funds collecting the receipts to the debt service fund as debt service payments become due; and (3) use unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

P. Other Information

1. Commitments and Contingencies

Under the terms of various federal and state grants and regulatory requirements, periodic audits are required and certain cost may be questioned as not being appropriate expenditures under the terms of the grants and requirements. Such audits could lead to reimbursement of the grantor or regulatory agencies. However, management does not believe such disallowances, if any, would be material to the financial position of the District.
Commitments - The District entered into a three year contract for janitorial cleaning services prior to the end of the fiscal year.

2. Single Audit

Current federal guidelines require entities with federal expenditures exceeding $750,000 to have a “single audit” of federally funded programs. This audit is being performed and the reports based thereon will be issued under a separate cover.

Q. Capital Projects Fund

The 2016 Capital Project Fund includes capital project activities funded with bonds issued after May 1, 1994. For these capital projects, the District has complied with the applicable provisions of §1351a of the Revised School Code.

Beginning with the year of bond issuance, the school district has reported the annual construction activity in the 2016 School Building and Site Fund. The project for which the 2016 School Building and Site Bonds were issued was considered complete on June 30, 2018 and the cumulative expenditures recognized for the construction period were $7,255,265.

R. Statement No. 77 – Tax Abatement Disclosures

Effective for the year ended June 30, 2018, the District is required to disclose significant tax abatements as required by GASB statement 77 (tax abatements).

The District received reduced property tax revenue as a result of Industrial Facilities Tax (IFT) exemptions granted by governmental entities within the District. The City of White Cloud and Everett Township are the only governmental entities within the District with IFT abatements. Industrial facility exemptions are intended to promote construction of new industrial facilities, acquisition of personal property or to rehabilitate historical facilities.

For the fiscal year ended June 30, 2018, (tax year 2017) the District’s property tax revenues were reduced by approximately $14,605 under this program.

The District is considered to be an “in-formula” district. The taxes abated for the General Fund operating millage are considered by the State of Michigan when determining the District’s section 22 funding of the State School Aid Act. The District received approximately $9,992 from the State of Michigan’s determination.

The District received reduced property tax revenue as a result of "New PPT" PA 328 of 1998 exemptions granted by governmental entities within the District. The City of White Cloud is the only governmental entity within the District with New PPT abatements. New PPT abatements are intended to promote bringing new business or more business to the State of Michigan.

For the fiscal year ended June 30, 2018, (tax year 2017) the District's property tax revenues were reduced by approximately $1,595 under this program.

S. New Accounting Standards

The District implemented the following new pronouncements: GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*.

Summary:

GASB Statement No. 75 requires governments that participate in defined benefit other postemployment benefit (OPEB) plans to report in the statements of net position a net OPEB liability. The net OPEB liability is the difference between the total OPEB liability (the present value of projected benefit payments to employees based on their past service) and the assets (mostly investments reported at fair value) set aside in a trust and restricted to paying benefits to current employees, retirees, and their beneficiaries. The Statement requires cost-sharing employers to record a liability and expense equal to their proportionate share of the collective net OPEB liability and expense for the cost-sharing plan. The Statement also will improve the comparability and consistency of how governments calculate the OPEB liabilities and expense.

The restatement of the beginning of the year net position is as follows:

Net Position - Governmental Activities - As Previously Reported, June 30, 2017	$ (12,107,657)
Adoption of GASB Statement 75:	
Net Other Postemployment Benefit Liability	(5,159,880)
Deferred outflows related to Other Postemployment Benefits	392,909
Deferred inflows related to Other Postemployment Benefits	(157,419)
Net Position - Governmental Activities - Restated as of June 30, 2017	$ (17,032,047)

NOTE 4 – UPCOMING ACCOUNTING PRONOUCEMENTS

The District is currently evaluating the impact these standards will have on the financial statements when adopted.

Governmental Account Standards Board (GASB) Statement No. 84, *Fiduciary Activities*, was issued by the GASB in January 2017 and will be effective for the District's 2020 fiscal year end. The objective of this Statement is to improve guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported. This Statement establishes criteria for identifying fiduciary activities for all state and local governments. The focus on the criteria generally is on (1) whether a government is controlling the assets of the fiduciary activity and (2) the beneficiaries with whom a fiduciary relationship exists. An activity meeting the criteria should be reported in a fiduciary fund in the basic financial statements.

Districts with activities meeting the criteria should present a statement of fiduciary net position and a statement of changes in fiduciary net position.

Governmental Account Standards Board (GASB) Statement No. 87, *Leases,* was issued by the GASB in June 2017 and will be effective for the District's 2021 year end. The objective of this Statement is to increase the usefulness of governments' financial statements by requiring recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use the underlying asset. Under this Statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources, thereby enhancing the relevance and consistency of information about governments' leasing activities.
